# What do the results in the data table mean?

- 1. We measure 2 things:
  - a. How low can the light dim compared to the maximum light output?
  - b. Can you see the lights flicker when they are dimmed?
- 2. What do the colors mean?

	Dimming Depth	Observable Flickering?
Excellent	10%	< 30% of people see flicker at lowest depth
Good	13%	< 50% of people see flicker at lowest depth
Compatible (industry standard)	20%	~ 50% of people see flicker at lowest depth
Not suitable	> 20%	> 50% of people see flickering near lowest depth

IMPORTANT NOTICE – Because dimming equipment, applications, and conditions of use are many, varied, and beyond our control, this information necessarily is based on limited sample sizes and testing, and Savant Technologies LLC does not represent or warrant the suitability of a lamp for any particular application or use in any particular equipment. This information may be updated and changed at any time without notice as new equipment and information is developed.
