Cync reveal® HD+ Full Color Undercabinet Fixture Quick Start Setup Guide

Welcome to Cync!

You've chosen a great product to enhance your smart home living and entertainment.

There are 3 ways to get started, which are outlined in this guide. Use the native Cync App to connect all of your Cync products and get the full range of features. Connect via Matter to streamline your smart products. Lastly, with a professionally installed Savant System, a pro can commission this Cync product in your Savant home.

Learn more about all 3, and choose which set up is right for you.

Touch Controls

Get Started With Cync

Get Started With Matter

Get Started With Savant

Power Icon: Quick Touch - Powers the bar On/Off.

Long Hold - Factory Reset back to original settings.

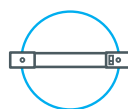

Cycle Icon: Quick Touch - Cycle through preset colors and white tones.

Long Hold - Gradually dims and brightens light; release hold when desired brightness is reached.

Please note:

You may see a "set up using Matter" notification on your phone. To set up in the Cync App, powered by Savant, dismiss the notification.

Enable all Cync features

Install your fixtures, and power on.

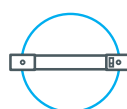

Scan QR code to download the Cync App and complete setup:

Connect with other smart products

NOTE: If you already have Cync devices in the Cync App, add your new device to the Cync App, then enable your voice assistant.

Install your fixtures, and power on.

Open your preferred smart home app:

- Google Home
- Samsung SmartThings
- Amazon Alexa
- Apple Home

and scan the Matter QR code or enter the 11-digit code on the device sticker to complete setup.

Professionally installed smart home

Savant's professionally installed smart home system unifies your connected environment into one integrated experience controlled by intuitive, award-winning software.
