

Direct Connect Light Strip Thin Style Installation Guide

GE is a trademark of General Electric Company. Used under trademark license.

What's Included

(Devices each sold separately)

Light Strip Contents

1. 16ft or 32ft Light Strip
2. Power supply with plug
3. Control box mounting screws & adhesive tape
4. Cleaning wipe

Easy Set Up

STEP 1

Determine location for your Direct Connect Light Strip and measure.

STEP 2

Trim to desired length.

STEP 3

Prep surface and install.

STEP 4

Set up in your preferred app.

NOTE: Direct Connect Thin Style Light Strips are not compatible with Direct Connect Light Strip Extensions.

Measure & Trim to Size

(If desired)

STEP 1

Measure where you're planning to install your lights.

STEP 2

With your Light Strip unplugged, safely cut where the trim points are indicated.

▲ Make sure the strip is not plugged in at the wall when cutting.

NOTE: Cutting anywhere else will permanently damage the strip.

▲ WARNING!

Do not bend near LEDs.

Do not bend more than 90°.

Do not mount to wallpaper, brick, textured or porous surfaces.

Prep the Surface & Install Your Strip

STEP 3

Use the cleaning wipe to remove dust.

NOTE: Make sure surface is dry & free of dirt, dust and oils. For best results, tape the strip in temperatures above 50°F/10°C.

Working in 6 inch sections, peel off the adhesive backing.

Stick to surface, 6 inches at a time, pressing and **holding each section for 10 seconds.**

NOTE: Adhesive may damage walls or painted surfaces if removed. Adhesive is single use, so don't peel lights and try to re-stick to wall. You will need to use double-sided tape if re-application is needed.

Mount Control Box

STEP 1

Determine location to install the control box.

STEP 2

Mounting control box to wall using either adhesive tape or screws.

Adhesive Tape

Peel and stick adhesive tape to the back of the control box. Press and hold for 10 seconds.

Peel the other side and stick to surface, pressing and holding for 10 seconds.

Screws

Locate mounting holes on control box and thread screws through holes. Use Phillips screwdriver or drill on low torque setting to screw into wall. Some surfaces may require a pilot hole.

Enable Smart Control

	Set up with Cync	Set up with Matter
Set schedules & control away from home	✓	✓
Connect to Amazon Alexa & Google Assistant	✓	✓
Connect to Apple Home & Samsung SmartThings		✓
Basic color control	✓	✓

Get Started

Get Started With Cync

Plug in and power on your Direct Connect Light Strip.

Scan QR code to download the Cync App and complete set up.

Get Started With Matter

Plug in and power on your Direct Connect Light Strip. If your preferred smart home app says "New light bulb found," you're all set!

If not, open your app of choice: **Google Home, Samsung SmartThings, Amazon Alexa, or Apple Home** and scan Matter QR code or enter 11-digit code on the device sticker to complete set up.

You may set up your device through Cync or Matter, but not both. To switch after setting up, you will need to reset the device and set up again.

NOTE: You may see a "set up using Matter" notification on your phone. To set up in the Cync App, powered by Savant, dismiss the notification.

FCC Statement

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF Radiation Exposure

Statement Caution: To maintain compliance with the FCC's RF exposure guidelines, place the product at least 20cm from nearby persons. The device must not be co-located or operating in conjunction with any other antenna or transmitter.

IC Statement

This device complies with RSS247 of Industry Canada. Cet appareil se conforme à RSS247 de Canada d'Industrie.

This device complies with Industry Canada license-exempt RSS standard(s).

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. Appareils radio exempts de licence. Son fonctionnement est sujet aux deux conditions suivantes: (1) le dispositif ne doit pas produire de brouillage préjudiciable, et (2) ce dispositif doit accepter tout brouillage reçu, y compris un brouillage susceptible de provoquer un fonctionnement indésirable.

This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This transmitter must be installed to provide a separation distance of at least 20cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter.

Cet équipement est conforme aux limites d'exposition aux rayonnements IC RSS-102 définies pour un environnement non contrôlé. Cet émetteur doit être installé pour fournir une distance de séparation d'au moins 20 cm de toutes les personnes et ne doit pas être colocalisé ou fonctionner en conjonction avec une autre antenne ou émetteur.
