

LED⁺

one bulb + one function

GETTING STARTED GUIDE

See reverse side for steps

1

Insert bulb into fixture

2

Turn on power source to the bulb*

3

Bulb will turn on when motion is detected at night**

Visit gelighting.com/led-plus

*The bulb will turn on for 30 seconds to indicate bulb is powered on, then turn off until activated by motion at night.

**For always-on mode, turn the wall switch off and on twice within 3 seconds. The bulb will flash to confirm that always-on mode is active. To re-activate motion-sensing mode, turn the wall switch off for more than 3 seconds and then turn on. The bulb will stay on for 5 minutes after the last motion is detected.
